This systematic overview illustrates the company's growth and expansion, emphasizing their commitment to quality and relationships with clients.

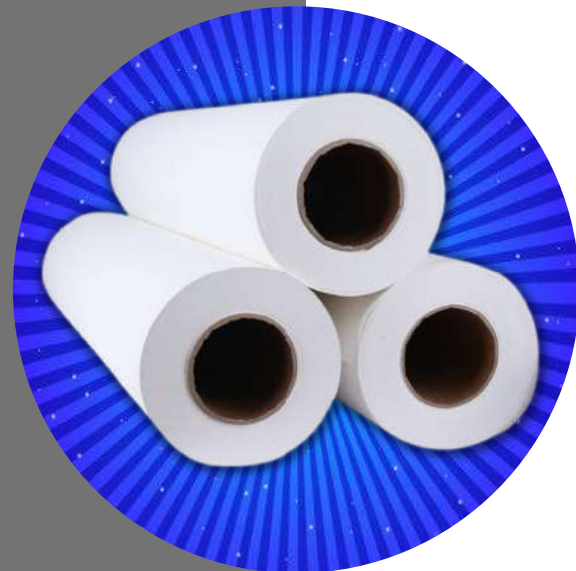

## 65 GSM

65 GSM is the unique quality created by us when we built our first coating line in 2018.

65 GSM is Considered as a balance quality paper for getting desired results with affordable price for all

We only used pure TNPL RNS grade virgin half white base paper and unique coating chemical to serve our customer same quality all the time.

24"inch to 72" inch size we are making in 65 GSM

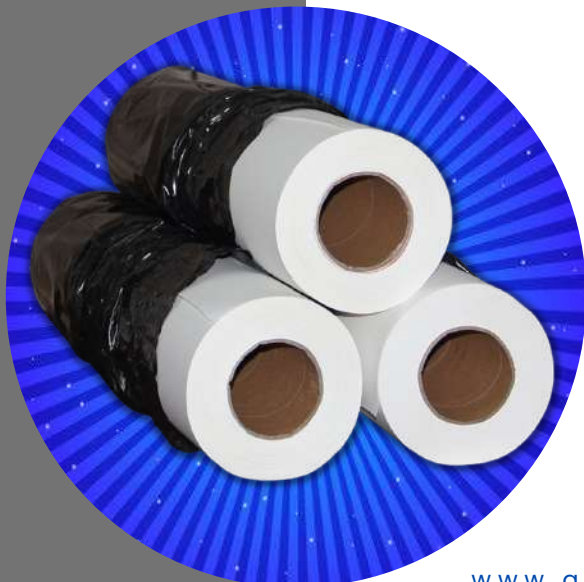

## 75 GSM

75 GSM quality developed by us is perfectly Suitable for any type of dark printed design and any high volume of ink coverage.

Drying Speed and ink absorbing capacity of 75 GSM paper is incomparable

75 GSM gives excellent line sharpness and suitable for all kind of polyester fabrics.

36"inch to 64"inch sizes we are making in 75 GSM

## 90 GSM

Darkest to Darket Design you can print with 90 GSM Special Virgin paper.

Drying Speed and ink absorbing capacity of 90 GSM paper is much better and higher compare to other qualities

90 GSM gives excellent line sharpness and suitable for all kind of polyester fabrics.
