SECTION II – RISK FACTORS

Investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Prospectus, including the risks and uncertainties described below and the Financial Statements incorporated in this Draft Prospectus, before making an investment in the Equity Shares of our Company. Any potential investor in, and subscribers of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 81 and 147, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality therein:

- *Some risks may not be material at present but may have a material impact in the near future.*
- *Some risks may not be material individually but may be found material when considered collectively*
- *Some risks may have material impact qualitatively and not quantitatively and vice-versa*

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares and may also have an adverse effect on our business. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further details, please refer to chapter titled “Forward-Looking Statements” beginning on page 12 of this Draft Prospectus.

Unless otherwise indicated, all financial information included herein are based on our Financial Statements. Please refer to the section titled “Restated Financial Statements” beginning on page no. 121 of this Draft Prospectus.

INTERNAL RISK FACTORS:

1. ***Our Company is yet to place orders for the equipment, plant and machinery for the expansion of the Manufacturing Facility. Any delay in placing orders or procurement of such equipment, plant and machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.***

The total Gross block of the company as on March 31, 2025 was 64.50 lakhs. Company has received third party quotations for the equipment, plant and machinery proposed to be installed in the proposed expanded manufacturing facility. Although, we have identified the type of equipment, plant and machinery proposed to be purchased from the Net Proceeds, we are yet to place orders for the proposed equipment, plant and machinery amounting to approximately ₹540.00 lakhs excluding installation and transportation charges. The cost of the proposed purchase of equipment, plant and machinery is based on the quotations received from third party vendors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, see “**Objects of the Issue**” on page 60.

We cannot assure that we will be able to procure the equipment, plant and machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of our Manufacturing Facility. Further, if we are unable to procure machinery and equipment from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery and equipment which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be

extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

2. We are dependent on third parties for the supply of utilities, such as water, gas and electricity, at our manufacturing facilities and any disruption in the supply of such utilities could adversely affect our manufacturing operations.

Our business is dependent on the delivery of an adequate and uninterrupted supply of electricity, water and fuel. We procure utilities, such as water and electricity, from third parties for use at our manufacturing facilities. Reliance on third parties for such utilities exposes us to risks such as shortage or breakdown in supply, the correction of which is in the hands of such third parties. Although we have not faced any such instances in the past, any interruption in the continuous supply of water, gas, electricity may negatively impact our manufacturing processes, which may result in delays in delivery of our products or non-delivery, resulting in loss of revenue and damage to our reputation or customer relationships. In case of the unavailability of any supply from, any of our utility providers for any reason, we are unable to assure you that we shall be able to source such utilities from alternate sources in a timely manner and at a commercially reasonable cost, which could adversely affect our business, results of operations and financial condition. For details, see “***Our Business under the heading “Power”***” on page 92 of this Draft prospectus.

3. We operate out of a single Manufacturing Facility, located at Rajkot, Gujarat which exposes our operations to potential geographical concentration risks arising from local and regional factors which may adversely affect our operations and in turn our business, results of operations and cash flows.

As on the date of this Draft Prospectus, we are operating out of our Manufacturing Facility which is situated in Palsana, Surat, Gujarat. For details, see “***Our Business - Manufacturing Facility***” on page 94. Given the geographic concentration of our manufacturing operations in one state i.e. Gujarat, our operations are susceptible to disruptions which may be caused by certain local and regional factors, including but not limited to political, economic and weather conditions, natural disasters, demographic factors, and other unforeseen events and circumstances. Apart from COVID-19 related operational restrictions, that were imposed on our facility, we have not experienced any material disruption at any of our existing manufacturing facility in the past. If any such disruptions occur, our operations may be affected leading to significant delays in the manufacturing and sale of our products which could materially and adversely affect our business, financial condition and results of operations.

4. Our business is concentrated in Gujarat State and any adverse development affecting our operations in this state could have an adverse impact on our business, financial condition and results of operations.

Our major business is concentrated in the state of Gujarat. The revenue from operations from the state of Gujarat for the FY 2025, FY 2024 and FY 2023 was ₹ 4003.76 Lakhs (65.73% of the total revenue), 1922.62 Lakhs (76.53% of the total revenue) and 2495.59 Lakhs (98.81% of the total revenue) respectively. The raw materials and finished products handled by the Company are bulky and heavy, making transportation to distant markets economically unviable. As a result, our major revenue and business activities are concentrated within the state of Gujarat. This geographic concentration increases our exposure to region-specific risks, including the outbreak of pandemics, economic or political instability, demographic shifts, regulatory changes, and natural disasters. Any such adverse developments, which are beyond our control, could significantly impact our business operations, financial condition, and overall performance.

5. We are dependent on our Promoters for functioning of our business and we believe that our senior management team and other key managerial personnel in our business are critical to our continued success and we may be unable to attract and retain such personnel in the future.

Our performance depends largely on the efforts and abilities of our Promoters. For details, see “***Our Promoters and Promoter Group***” on pages 117. We believe that the inputs and experience of our Promoters Directors are valuable for the growth and development of business and operations and the strategic directions taken by our Company. Our business and operations are led by our Promoters and Directors, who possess experience in the pharma industry, the loss of whose services may adversely affect our business operations.

At the same time, our future success also substantially depends on the continued service and performance of the members of our senior management team and other key managerial personnel in our business for the management and running of our daily operations and the planning and execution of our business strategy.

6. We are dependent on third party transportation service providers for delivery of raw materials from suppliers to us. Any failure on part of such transport service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

The manufacturing process of sublimation heat transfer paper rolls is our main activities, we purchase the raw materials (Paper, coating, chemical etc.) from the market and process it in to coated jumbo reels in our factory and sale the same in the market, our success depends on the smooth supply and transportation of raw materials from our suppliers to our factory premises which

are subject to various uncertainties and risks. In addition to this, our Raw Material, paper rolls, may be damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of such materials which may also affect our business and our results of operation negatively. We have not entered in to any agreement with any of the transport service providers. Any failure to maintain a continuous supply of raw materials to our manufacturing unit and finished products to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition, results of operations and reputation.

7. Our revenue from operations is dependent upon a limited number of customers and the loss of any of these customers or loss of revenue from any of these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We derive a major portion of our revenue from top 10 customers. The table below sets forth our revenue derived from our top ten (10) customers for the Fiscal year 2025, 2024 & 2023, respectively and its percentage to total revenue from operations.

(Rs. In lac)

Period	Revenue from Operations	Revenue contribution of our top 10 Customers	% of Revenue contribution of our top 10 customers
Fiscal Year 2025	6091.08	1825.71	29.97
Fiscal Year 2024	2512.31	848.00	33.75
Fiscal Year 2023	2525.64	1159.64	45.91

The loss of any one or more of such key customers for any reason including due to failure to negotiate acceptable terms of purchase order, negotiations, disputes with customers, adverse change in the financial condition of such customers, including due to possible bankruptcy or liquidation or other financial hardship, merger or decline in their sales, reduced or delayed customer requirements, or work stoppages could have an adverse effect on our business, results of operations and financial condition.

8. Any fluctuations in prices of raw materials or shortage in supply of raw material for manufacturing our products, could adversely impact our business.

Our company depends significantly on key raw materials such as base paper and coating compounds for producing sublimation heat transfer paper rolls, which exposes us to risks related to price volatility and supply shortages. The cost of raw material in relation to revenue from operation was more than 85% of the total Paper rolls are one of the major raw materials in our manufacturing process. Generally, we are purchasing paper rolls from the Paper manufacturing mills/company and their dealer s. Since we have not executed any agreement with our supplier for the supply of raw materials, we purchase raw materials on an order-by-order basis. Any increase in the prices or shortage of key raw materials could raise our production costs and negatively impact our business and profitability if we are unable to pass on these cost increases to our customers. If we are unable to pass these cost increases onto consumers due to competition or other factors, our profitability could be adversely affected.

9. We have not entered into long-term contracts with our major customers and we operate on the basis of purchase orders, which could adversely affect our revenues and profitability.

We get orders generally by our continuing relationships with our customers. We do not have enter in to any long-term contract with our customers. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of order by, a major customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our business, revenues, cash flows and operations. Although we believe that we have satisfactory business relations with our customers and have received continued business from them in the past, but we cannot assure you that the same will continue in the years to come and may affect our revenues and profitability adversely.

10. Our insurance coverage may not be sufficient or adequate to protect us against all material hazards, which may adversely affect our business, results of operations, financial condition and cash flows.

Loss of our Promoter or our inability to attract or retain such qualified personnel, could adversely affect our business, results of operations and financial condition.

We believe that our Promoters have played a key role in the development of our business and we benefit from their industry knowledge and expertise, vision and leadership. Our Promoters have strong operational knowledge, good relationships with our clients and a successful track record of executing growth plans. In addition to our Promoter, our key management and senior management team includes experienced and skilled professionals who possess requisite experience across various aspects of our business. We believe the stability of our management team and the industry experience brought on by our individual Promoters enables us to continue to take advantage of future market opportunities.

We expect our future growth to place significant demands on our management and operations, and require us to continuously evolve and improve our financial, operation and other internal controls across the organization. In particular, continued expansion increases the risks discussed in this section as well as other risks.

As part of our growth strategy, we commenced trading activities alongside our manufacturing operations in the financial year 2025. While trading carries relatively lower margins, it serves as a strategic initiative to penetrate new geographical markets and establish relationships with a wider customer base, thereby supporting the long-term expansion of our core business.

The success of our business will depend greatly on our ability to implement our business and strategies effectively. See “Business Overview – Our Strategy” on page 87. Even if we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of our targeted clients. Some of our competitors may be increasing the span of their services, their capacities and targeting the same services in which we are dealing at a lower price. There can be no assurance that we can continue to compete effectively with our competitors in the future, any failure to compete effectively may have an adverse effect on our business, financial condition and results of operations. In addition to this, as a result of the intense competition and accelerated innovation in our Industry, our ability to achieve and maintain profitability depends on a number of factors, including our investment in assets-based module and development, expanding the manufacturing activities and the pricing levels of our competitors, some of which is beyond our control. Further, as a publicly listed company, the Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of the Company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of the Company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE.

29. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

30. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed fund requirement, for funding our capital expenditure for expansion and working capital requirements, primarily, as detailed in the chapter titled "Objects of the Issue" beginning on page no. 60 of this Draft Prospectus is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

33. Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire post-Issue paid-up share capital, held by shareholders (Other than promoter and promoter group) will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years, and Fifty percent of promoters' holding in excess of minimum promoters' contribution shall be locked in for a period of two years and Remaining fifty percent of promoters' holding in excess of minimum promoters' contribution shall be locked in for a period of one year from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled "Capital Structure" beginning on page no. 47 of this Draft Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

34. The issue price of the Equity Shares may not be indicative of market price of our equity shares after the issue and the market price of our Equity shares may decline below the issue price.

The issue price of our Equity shares is decided on the basis of both qualitative and quantitative factors. The Company had made good progress in establishing its name in the sublimation heat transfer paper. All such points have been considered in deciding the issue price of the Equity Shares. Please refer chapter titled "Basis for Issue Price" beginning on the page no 66 of the Draft prospectus. The market price of our equity shares could be subject to change after the issue and may decline the below the issue price.

35. Sale of shares by our promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

The sale of shares by the promoters or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoters. However, the closing of trading windows during the period of financial results may restrict the promoters from selling the shares in the open market.

34. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

35. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

36. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

37. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

Tel No: 040-40527777, 40727777

Email: compliance@bnrsecurities.com

Website: www.bnrsecurities.com

Contact Person: Mr. Chetan Rathi

SEBI Registration No: INZ000160834

BSE Member Code: SMEMM0323308112023

B. N. Rathi Securities Limited is registered with Platform of BSE as a Market Maker and has agreed to receive or deliver the Equity Shares in the market making process for a period of three (3) years from the date of listing of our Equity Shares or for a period as may be notified by any amendment to SEBI (ICDR) Regulations, 2018.

The Market Maker shall fulfill the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, 2018 and its amendments from time to time and the circulars issued by the BSE and SEBI regarding this matter from time to time.

Following is a summary of the key details pertaining to the Market Making arrangement:

1. The Market Maker(s) (individually or jointly) shall be required to provide a 2-way quote for 75% of the trading hours in a day. The same shall be monitored by the stock exchange. Further, the Market Maker(s) shall inform the exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).
2. The prices quoted by Market Maker shall be in compliance with the Market Maker Spread Requirements and other particulars as specified or as per the requirements of BSE Limited (SME platform of BSE) and SEBI from time to time.
3. The minimum depth of the quote shall be ₹ 1,00,000/-. However, the investors with holdings of value less than ₹ 1,00,000/- shall be allowed to offer their holding to the Market Maker in that scrip provided that he sells his entire holding in that scrip in one lot along with a declaration to the effect to the selling broker. The minimum lot size in the IPO is 2,000 Equity Shares subject to minimum two lots per application, thus, the minimum depth of the quote shall be such an amount that the minimum lot of 2,000 Equity Shares subject to minimum two lots per application is met, until the same is revised by Stock exchange.
4. The Market Maker shall not sell in lots less than the minimum contract size allowed for trading on the SME Platform (in this case currently the minimum trading lot size is 2,000 Equity Shares subject to minimum two lots per application equity shares; however, the same may be changed by the SME Platform of stock exchange from time to time).
5. After a period of three (3) months from the market making period, the Market Maker would be exempted to provide quote if the Shares of Market Maker in our company reaches to 25% of Issue Size (including the 1,12,000 Equity Shares to be allotted under this Issue to the Market Maker). Any Equity Shares allotted to Market Maker under this Issue over and above 5% of Issue Size would not be taken into consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of Market Maker in our Company reduces to 24% of Issue Size, the Market Maker will resume providing 2-way quotes.
6. There shall be no exemption/threshold on downside. However, in the event the Market Maker exhausts his inventory through market making process, the stock exchange may intimate the same to SEBI after due verification. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.
7. There would not be more than five (5) Market Makers for scrip of the company at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investor.
8. The Market Maker shall start providing quotes from the day of the listing / the day when designated as the Market Maker for the respective scrip and shall be subject to the guidelines laid down for market making by the Exchange.
9. The Equity Shares of the Issuer will be traded in continuous trading session from the time and day the Issuer gets listed on BSE and Market Maker will remain present as per the guidelines mentioned under BSE Limited and SEBI circulars or amended from time to time.
10. The Market Maker shall not buy the Equity Shares from the Promoters or Promoter Group of the Issuer or any person who has acquired Equity Shares from such Promoter or Promoter Group, during the Compulsory Market Making Period.
11. The Promoters' holding of the Issuer which is locked-in shall not be eligible for offering to Market Maker during the Compulsory Market Making period. However, the Promoters' holding of the Issuer which is not locked in as per SEBI ICDR Regulations can be traded with prior permission of the BSE, in the manner specified by SEBI from time to time.

combined turnover of the Partnership firm and the company

This consistent revenue growth is a due to result of the Company's strategic initiatives, expansion into new markets, and strengthening of its business verticals. Consequently, the working capital requirement has also seen a proportionate increase to support higher volumes of business activity, increased procurement of raw materials, enhanced inventory levels and extended credit terms to customers. Further working capital requirement will be increased due to expansion in business by increasing the installed capacity by installing two Sublimation paper Coating Machine. The partnership firm was borrowing unsecured loans from the Banks and NBFCs. The rate of interest was high and the partners have repaid high interest bearing loans by raising the share capital. The proposed deployment of Net Proceeds towards working capital is, therefore, intended to reduce our dependence on external borrowings, improve liquidity, and provide greater financial flexibility to sustain our growth momentum.

The infusion of ₹650.00 lakhs from the Net Proceeds will play a pivotal role in supporting the Company's working capital cycle amidst this phase of expansion. It will not only bolster our financial flexibility and liquidity position but also reduce our dependence on external borrowings. This, in turn, will enable us to optimize our cost of capital and improve margins. Given the year-on-year growth trajectory in our business, this fund infusion will act as a catalyst for scaling operations, launching new products, entering new markets, and achieving our strategic goals with greater efficiency and speed.

Considering the growth of our Company, we will require additional working capital to fund our growth.

INDIAN ECONOMY

Introduction

Each year, a day before the presentation of the budget document, the central government presents an Economic Survey. However, owing to the upcoming elections, the economic survey was not unveiled on January 31. Instead, the government has issued a report titled 'Indian Economy–A Review,' detailing India's progress over the past decade. This report, prepared by the office of the Chief Economic Advisor (CEA) V Anantha Nageswaran, also provides insights into the economic outlook for the upcoming years.

Decade of transformative growth (2014-2024)

The Indian economy underwent significant structural reforms during this period, boosting its macroeconomic foundations. These measures propelled India to become the fastest-growing economy among G20 nations. Further, efficient handling of the COVID-19 pandemic and recent geopolitical challenges has ensured that the Indian economy continues to outperform its global peers. Current estimates suggest a growth of 7.3% in 2023-24, building on the impressive 9.1% (FY22) and 7.2% (FY23) growth in the preceding two years. It is commendable that India is expected to post a GDP growth rate of over 7% for the third year in a row while the global economy is struggling to post a 3% growth.

The structural reforms implemented since 2014 have strengthened the macroeconomic fundamentals of the economy. Below, we list the key reforms implemented during the last decade:

India's robust external sector demonstrating resilience in challenging times: India's external sector displays resilience with robust merchandise and services exports. Merchandise exports reached a record high of US\$ 451.1 billion in FY23, while services exports, especially in software, consistently contribute significantly. The nation's trade balance improved, witnessing a US\$ 166.4 billion surplus in April-November 2023. Remittances, totaling US\$ 125 billion in 2023, contribute to the current account balance, maintaining a comfortable position.

India attracts foreign investment, with foreign portfolio investors (FPIs) increasing exposure by US\$ 28.8 billion in H1 FY24. The country remains a preferred Foreign Direct Investment (FDI) destination, achieving a cumulative FDI of US\$ 596.5 billion during FY15-FY23. Stable macroeconomic factors and a positive global perception attract investors. The Indian rupee remains stable against the US dollar, and foreign exchange reserves reach US\$ 623.2 billion, covering over ten months of imports.

Challenges, such as geopolitical tensions and rising shipping costs, pose risks. While the share of exports in GDP may moderate in FY24 due to global demand slowdown, sustained FDI inflows and confidence in the Indian economy are anticipated. Remittances are expected to grow by 8%, reaching US\$ 135 billion in 2024, contributing to India's economic stability.

Continued focus on enhancing social infrastructure: The Union government's spending on social services saw a Compound Annual Growth Rate (CAGR) of 5.9% from FY12 to FY23, with an 8.1% CAGR in capital expenditure, indicating the development of societal assets. Initiatives like the Ujjwala Yojana, PM-Jan Aarogya Yojana, PM-Jal Jeevan Mission, Ayushman Bharat scheme, and PM-AWAS Yojana prioritize universal access to basic amenities. This approach, distinct from short-term measures, not only constructs lasting social infrastructure but also elevates individuals to improved living standards and opportunities, fostering empowerment among previously underserved segments of the Indian population.

The Road Ahead

The report states that India's robust growth is anticipated to continue, supported by macroeconomic stability. The official estimate for FY24 projects a 7.3% growth rate, with decreasing headline inflation. Favorable factors include resilient service exports, lower oil import costs, and a reduced current account deficit of 1% of GDP in H1 FY24. The positive outlook is driven by the digital revolution, supportive regulatory environment, social and economic upliftment measures, and efforts to diversify exports. Reforms implemented over the past decade establish a foundation for resilient governance, setting the stage for sustained economic growth. Further reforms at sub-national levels, focusing on MSMEs, regulatory efficiency, land availability, and energy needs, are expected to accelerate economic growth.

TEXTILE INDUSTRY

The organized retail apparel sector is projected to achieve revenue growth of 8-10% in the current financial year, driven by rising demand from a normal monsoon, easing inflation, and the festive and wedding seasons. The increasing preference for affordable, trendy fashion clothing that mimics high-fashion designs is expected to be the primary revenue driver this fiscal year.

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre /yarns from natural fibres like cotton, jute, silk, and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country.

India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world. In order to attract private equity and employ more people, the government

introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

Market Size

The market for Indian textiles and apparel is projected to grow at a 10% CAGR to reach US\$350 billion by 2030. Moreover, India is the world's 3rd largest exporter of Textiles and Apparel. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$100 billion.

The textiles and apparel industry contributes 2.3% to the country's GDP, 13% to industrial production and 12% to exports. The textile industry in India is predicted to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade.

Textile manufacturing in India has been steadily recovering amid the pandemic. The manufacturing of textiles Index for the month of June 2024 is 106.

Global apparel market is expected to grow at a CAGR of around 8% to reach US\$ 2.37 trillion by 2030 and the Global Textile & Apparel trade is expected to grow at a CAGR of 4% to reach US\$ 1.2 trillion by 2030. India's home textile industry is expected to expand at a CAGR of 8.9% during 2023-32 and reached US\$ 23.32 billion in 2032 from US\$ 10.78 billion in 2023.

The Indian Technical Textile market has a huge potential of a 10% growth rate, increased penetration level of 9-10% and is the 5 largest technical textiles market in the world. India's sportech industry is estimated around US\$ 1.17 million in 2022-23.

CHEMICAL INDUSTRY

Introduction of Chemical Industry

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilizers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. The Indian chemical industry is currently valued at US\$ 220 billion and is expected to reach US\$ 300 billion by 2030 and US\$ 1 trillion by 2040. This industry remains an active hub of opportunities, even in an environment of global uncertainty.

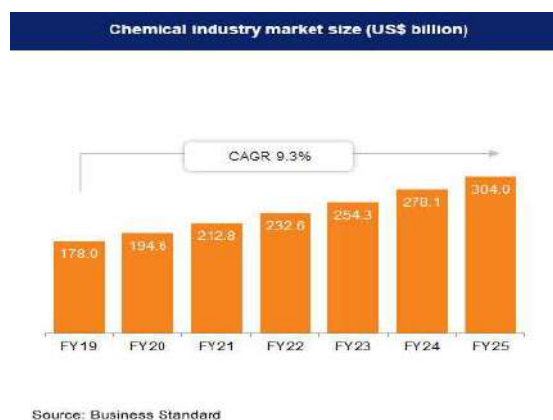

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world's production of dyestuffs and dye intermediates. From April-May 2024, the export of agrochemicals was US\$ 661.18 million, dyes were US\$ 379.61 million and the other dye intermediates were US\$ 27.87 million. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for a few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply.

Market Size

India's chemical sector, which is worth US\$ 220 billion currently, is anticipated to grow to US\$300 billion by 2030 and US\$ 1 trillion by 2040. The demand for chemicals is expected to expand by 9% per annum by 2025.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Specialty chemicals account for 20% of the global chemicals industry's US\$ 4 trillion, with India's market expected to increase at a CAGR of 12% to US\$ 64 billion by 2025. This gain would be driven by a healthy demand growth (CAGR of 10-20%) in the export/end-user industries.

The Department of Chemicals & Petrochemicals intends to bring PLI in the chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.

The Indian chemical industry is expected to further grow with a CAGR of 11-12% by 2027, increasing India's share in the global specialty chemicals market to 4% from 3%.

A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand was expected to fuel significant revenue growth of 18-20% in 2022 and 14-15% in 2023.

Road Ahead

Despite the pandemic situation, the Indian chemical industry has numerous opportunities considering the supply chain disruption in China and the trade conflict between the US, Europe and China. Anti-pollution measures in China will also create opportunities for the Indian chemical industry in specific segments.

Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry.

The dedicated integrated manufacturing hubs under the Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crores (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of the domestic chemical industry, future investments should not only focus on the transportation of fuels such as petrol and diesel but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

As on the date of this Draft Prospectus, we have sold our products in over 17 states of India and 2 Union territories. This reduces the intensity of any significant single customer's contribution in our revenues.

Our top ten customers contributed 29.97%, 33.75% and 45.91 % of our revenue from the Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively.

Our continuous focus on providing quality products consistently to our customers has helped us nurture long-term relationships with them. Our track record of delivering timely supply and demonstrated industry expertise has helped in forging strong relationships with them. We have a high customer retention and derive a significant proportion of our revenue from repeated business.

Our dedication to consistently delivering high-quality products has fostered strong, long-term relationships with our customers. This commitment has resulted in high customer retention and a substantial share of our revenue coming from repeat business.

Technological Advancements:

Innovation in coating technologies and paper quality significantly enhances print clarity, color vibrancy, and durability. Our Company continuously develop unique coatings to improve production processes so that we can maintain a strong competitive edge.

Product Quality and Consistency:

We provide sublimation papers that are key to achieving consistent results, especially when it comes to producing vibrant colors and durable prints. When our papers deliver these outstanding outcomes time after time, they help us to build trust and satisfaction among our customers. This consistency leads to long-lasting relationships with our clients, who rely on our dependable product performance.

Customization and Range of Offerings:

Offering a wide range of sizes, weights, and specialized products tailored to various industries—such as textiles, ceramics, and promotional items—provides us with a significant competitive advantage. Each industry has its own unique needs, and by providing the right products for these specific applications, we ensure that our customers get the best possible solutions for their businesses.

For example, in the textile industry, our papers may be optimized for fabric types or printing techniques, while in ceramics, our products could be designed to ensure the best color transfer for mugs, plates, or other items. Supply Chain Efficiency:

Companies with efficient, fast, and reliable delivery systems often outperform competitors. Timely shipments and the ability to meet demand fluctuations give a significant edge.

Brand Reputation and Customer Service:

Companies that offer excellent customer service, including support with printing techniques and troubleshooting, tend to build lasting relationships. This leads to repeat business and word-of-mouth recommendations.

Price Competitiveness:

While cost-effectiveness may not always be the most important factor, it is still essential. By offering a good balance between high quality and competitive pricing, companies can reach a wider range of customers and appeal to different market segments.

Sustainability and Eco-Friendly Practices:

As consumers and industries become increasingly aware of environmental issues, the demand for eco-friendly and sustainable products is growing. Offering sublimation paper not only meets consumer preferences but also demonstrates a company's commitment to reducing its environmental impact, which can lead to a competitive advantage.

In addition to using sustainable materials, we further enhance our eco-friendly approach by reusing sublimation paper through a process known as gumming. After the initial use, the paper can go through the gumming process again, allowing it to be reused rather than discarded. This not only minimizes waste but also reduces the need for new resources, contributing to more sustainable practices. By offering both eco-friendly products and reusing paper, we play an active role in promoting environmental responsibility, which resonates with customers and helps to support long-term sustainability goals.

Business Expansion

Considering the growth in demand for sublimation heat transfer papers having wide application in various industries including the printing, garments, textile, hosiery and household curtain and furniture, management has plans for business expansion by having additional equipment for coating and slitting of paper.

We have plans to acquire set of equipment as follows

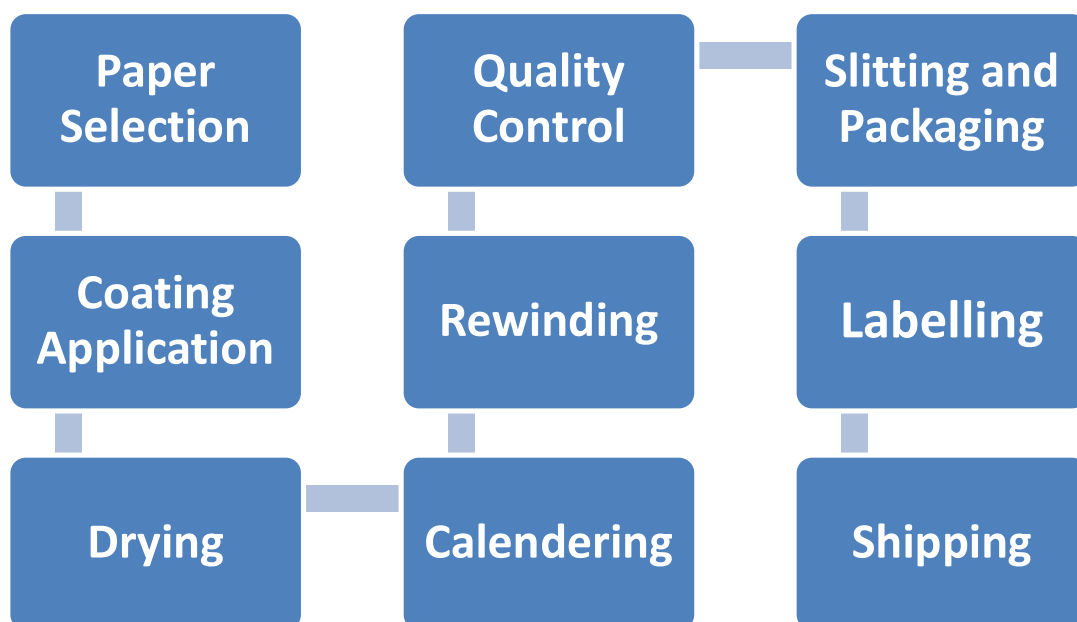

- 1) Fully Automatic Sublimation Paper Coating Machine with the coating speed of 200 meters per minute. Machines is suitable for base paper from 20 to 100 GSM and Coating 3 to 10 GSM. It has roller width 2000 mm and working width 1830 mm having unwinding and rewinding facility. Sublimation Paper Coating Machine is equipped with the most effective coating design, unwinder & rewinding, automatic load and control technology.
- 2) Automatic Slitter Rewinder machine with the work speed 200 to 300 meter per minute. It has roller width 2000 mm and working width 1830 mm having slitting & rewinding facility. It is suitable for 25 to 100 GSM paper slitting. Machines will have heavy duty plate structure, hard chrome plated roller mounting on plate, bow roller with bracket, Circular cutter and bottom cutter, rewinding, uploading & drive unit for movement of rolls.

On installation of above equipment, our company benefited as follows:

- Manufacturing capacity will increase by 850 lacs meters on annual basis with paper 20 to 50 GSM where demand is high
- Quality control and output will increase due to fully automatic and have functional control by computer panel.
- Coating machines with slitter will give synergy to make different length of paper roll as per the client requirement.
- Able to cater the customers with high end printing resolution on textile and other materials.

Manufacturing Process:

The Manufacturing Process of Sublimation Heat paper transfer

The manufacturing process of sublimation heat transfer paper rolls involves several key steps, focusing on the creation of a high-quality paper that is capable of transferring vibrant, durable images onto fabrics or other materials through a sublimation process. Below is an outline of the typical manufacturing process:

1. Paper Selection

- The process begins with the selection of a base paper, typically a high-quality coated paper, that is strong enough to withstand the sublimation process and have good dimensional stability during transfer. The paper must have smoothness and porosity to facilitate effective ink absorption.

2. Coating Application

- **Coating Formulation:** A special coating mixture is prepared, which contains coating powder (usually dye-based) and other chemicals to ensure proper adhesion to the paper. The coating is designed to allow the ink to remain on the surface of the paper until it is subjected to heat, at which point the ink sublimates (turns into gas) and transfers onto the material.
- **Coating Process:** The base paper is passed through a coating machine where the sublimation coating is evenly applied onto one side of the paper. This coating ensures that the ink is absorbed and released properly during the heat transfer process.

3. Drying

- After the coating is applied, the paper is dried using IR HEATERS Fixed in Heating Chamber to ensure that the coating solidifies and bonds properly to the paper. The drying process is crucial to avoid any smudging or bleeding of the ink during the transfer.

4. Calendering

- Calendering is a process where the coated paper is passed through a series of rollers to enhance the smoothness and consistency of the paper surface. This step can help improve the overall quality of the sublimation transfer by ensuring a uniform surface for better ink adhesion and even transfer.

5. Rewinding

- Once the paper is coated and dried, it is rewound into large rolls. These rolls can vary in size, depending on the final product requirements. The paper is carefully wound to prevent wrinkles or damage to the coating.

6. Quality Control

- The rolls are inspected for quality, ensuring the correct coating thickness, smoothness, and consistency. A test print is often done on the paper to ensure that it performs correctly during the sublimation process and that the colors transfer accurately and vividly.

7. Slitting and Packaging

- After passing the quality control checks, the large rolls are slit into smaller rolls, typically in widths that match industry standards or customer requirements. The rolls are then packaged carefully to prevent damage during shipping and handling.

8. Labelling:

- Each box of rolls is affixed with a sticker containing all material specifications along with a QC approval symbol, aiding customers in understanding the quality and specifications of the material.

9. Shipping

- Finally, the finished sublimation heat transfer paper rolls are ready for shipment to customers. They may be distributed to printing companies, textile manufacturers, or suppliers in various regions.

Raw Material

The raw materials for our products are primarily sourced from domestic suppliers across various regions in India, specifically from Tamil Nadu, Gujarat, and Maharashtra. These regions are known for their robust industrial infrastructure and supply of high-quality materials.

Our manufacturing process primarily relies on two key raw materials: the base paper and the coating layer. The base paper, typically sourced from specialized paper manufacturers in these regions, serves as the foundation of our products. It is selected for its high quality, consistency, and suitability for the sublimation printing process.

The coating layer, which is essential for ensuring optimal ink adhesion and transfer performance, is also sourced from trusted suppliers within these states. This coating layer is typically made from high-performance polymers, such as

polyester-based compounds, which help in retaining the sublimation inks and ensuring a smooth transfer onto the final material.

By sourcing these critical materials domestically, we not only support local industries but also maintain strict control over the quality and consistency of the raw materials used in our production process, ensuring that we deliver superior products to our customers.

Though, there is no conflict of interest between the suppliers of the raw materials and third-party service providers and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors. We do not have long-term supply agreements for our raw materials and procure them both from domestic sources and international suppliers.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at

fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('Act') read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(C) Significant Accounting Policies

1) Use of Estimates:

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

2) Fixed Assets & Depreciation:

Tangible Assets:

All items of fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred

Depreciation on fixed assets is provided on pro rata basis as per Straight Line Method based on the estimated useful life of various assets, as specified in Schedule II of the Companies Act, 2013.

Type of assets	Useful lives (in years)
Plant & machineries	15
Computers	3
Office equipments	5
Furniture and fixtures	10

Electrical installations	10

Intangible Assets:

An intangible asset is recognized when it is probable that the future economic benefits attributable to the asset will flow to the enterprise and where its cost can be reliably measured. Cost comprises the purchase price and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes and allocated incidental expenditure during development / acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

Subsequent expenditure relating to intangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Assets Acquired as Lease:

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the

inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

Advances paid towards the acquisition of Property, Plant and Equipment

Advances paid towards the acquisition of Property, Plant and Equipment, outstanding at each balance sheet date are shown under capital advances. The cost of the Property, Plant and Equipment not ready for its intended use on such date, is disclosed under capital work-in- progress.

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

4) Investments:

Investments, which are readily realizable and intended to be held for not more than 12 months from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

5) Inventories:

Inventories consisting of stock-in-trade are valued at the lower of cost and not realisable value Cost comprises all cost of purchases and other cost incurred in bringing the inventories to their present location and condition. Cost is determined on the specific identification basis"

9) Accounting for Government Grants/Refunds:

Government grants/subsidies and refunds due from Government Authorities are accounted when there is reasonable certainty of their realization.

10) Taxation

Tax expenses comprise current tax (amount of tax for the period determined in accordance with the Income Tax Regulations in India) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date, Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realized in future; however, when there is unabsorbed depreciation or carry forward losses under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and written down or written up to reflect the amount that is reasonably / virtually certain, as the case may be, to be realized

the management of the facts and legal aspect of the matters involved. Contingent assets are being neither recognized nor disclosed.

14) Current Assets, Loans and Advances
